Successful leader in portfolio and project management (PPM) working across the life sciences, insurance, transportation and oil & gas industries. Proven visionary in identifying and implementing innovative solutions.

ERNST & YOUNG, LLP (formerly UMT Consulting Group), New York, NY

Advisory Consulting Manager

June 2011 - Present

- Managing a Program Management Office (PMO) that oversees for a highly visible EY engagement responsible for multiple HR-based projects and over two dozen client serving professionals
- Leading analytics and reporting workstream; responsible for developing and refining process from request intake, approvals, and creation of reports
- Prepared current state Portfolio Project Management (PPM) assessment of a major insurance firm resulting in a roadmap that includes process reengineering recommendations and a short-list of PPM tool providers
- Developed and led a PMO charged with the planning and execution of over 1000 regulatory filings per year. This included developing business processes and instituting governance oversight to ensure efficient and accurate portfolio data.
- Configured MS Project Server instance that was the PPM technology backbone for a project that supported the tracking and managing of the workload of dozens of international regulatory offices to plan for and monitor regulatory filings; including the implementation of advanced reporting & analytical capabilities.
- Implemented end-to-end solution to standardize \$100 million supply chain network rationalization efforts to effectively manage the inventory management of a global supply chain
- Led the effort to replan the program schedule for a \$130 million public sector transportation project that includes responsibility for planning full spectrum of the software development lifecycle (SDLC) from concept to final acceptance testing
- Proposed a strategy for a client that allowed them to collect revenue in an accelerated manner, reducing its account receivable balance. Successful in developing initial proposal, creating cash flow model and influencing leadership to adopt for all program revenue
- Directed planning workshops with senior leaders and key stakeholders to foster agreement of scope, risks & issues, and critical success factors to rebuild a highly integrated, multi-year program schedule
- Acquired skills with complex MS Excel spreadsheets including the use of advanced formulas, attractive formatting, and pivot tables

J. CONNOR CONSULTING, INC., Houston, TX

Software Engineering Manager

September 2002 – June 2011

- Collaborated with the President and executive committee to convert legacy processes and systems into more efficient ones to increase operating efficiency and generate new revenue streams over \$1 Million
- Developed a team of software engineers who oversaw all product development activities, including planning, designing, testing, deploying, and maintaining over a dozen software applications
- Programmatically created MS Office documents using Visual Basic for Applications (VBA) that allowed oil & gas clients to generate regulatory documentation that included real-time data.
- Created a library of reusable programming code, reducing average software development by 25%
